

# International Software Company

## Company Profile

With over 3500 employees and more than 100,000 customers, this international software company is headquartered in San Francisco and is among the top of Fortune's 100 Best Companies to work for.

## Informatica 10.2 HF1 Implementation

In this project, Pacific Data Integrators (PDI) installed Informatica 10.2 HF1 in order to improve performance, reduce costs, and more.

## Business Challenges

Difficulties in scaling the ETL environment

Inability to take advantages of important AWS features: reliability, flexibility, security, easy maintenance, etc.

Low performance of business applications on an on-premise environment

---

## Project Goals

Reduce maintenance costs while meeting SLAs with equal or superior performance

A Lift & Shift migration of on-premise data warehouse application to AWS Redshift, with zero disruption to business

Implement a data lake to support data science-related business requirements

---

## Project Results

Reduced cost of infrastructure

Ability to take advantage AWS features for ETL platform, such as flexibility, easy maintenance, etc.

Improved performance of business applications on the AWS platform
